Hero / Header Section

- Item: Pocket Weather Meter

- Make: Kestrel

- Model: 3000 AN

- Photo:

- Quick note: Portable anemometer for field wind, temp, and humidity checks. Scan NFC tag for manuals, calibration, and logs.

Public Information (Visitor-Friendly)

Manufacturer & Documentation:

- [Product page – Kestrel 3000 AN](#)
- [User manual PDF](#)

Technical / Asset Info:

- NSN: 6660015072650
- Distributor: sales@r-p-r.co.uk
- Battery: CR2032
- Calibration:
  - Impeller: 1% per 100 hrs
  - Temp sensor: not required
  - Humidity sensor: 2% over 24m
-
- Storage: Remove battery for long-term storage

- Replacement cost: ~£200

Usage Notes:

- Ideal for field checks of wind, temperature, and humidity

- Not for life-critical measurements — verify calibration before mission use.

Optional Owner / Nerd Section (Collapsible)

Apple Shortcuts / Automation Links:

- Open manual → Launch PDF in Books or Files

- Log battery change → Update Notes log with timestamp

- Update calibration date → Record new calibration in Notes

- Email supplier → Prefilled email to sales@r-p-r.co.uk

Calibration / Usage Logs (example):

Date	Event	Notes	Logged by
24 Jan 2026	New battery	CR2032, checked voltage	Richie

10 Jan 2026	Calibration done	Impeller checked, humidity sensor within tolerance	

Advanced Tips:

- Keep away from strong magnetic fields during measurement

- Remove battery for long-term storage to avoid leakage

- Optional: use small protective pouch for impeller
